

Statement of Position

The Great Australian Party

Authorised by Ian Nelson for The Great Australian Party, PO Box 8242, South Perth 6151, Western Australia

Dear Miles

The Great Australia Party is dedicated to bringing all State legislation and regulation back to Commonwealth accountability. All of the States have clearly wandered off into the wilderness when it comes to jurisdiction over Commonwealth roads and all internal carriageways.

The States have only ever been given permission to maintain the Commonwealth roads not tax them and force motorists to accept that one State is a country mile from another State when it comes to the way they pass regulation and legislation for all vehicles.

Our party has a very strong argument targeting the inconsistency of vehicle standards and roadworthy requirements between all of the States. Our aim is to align all legislation country wide. We will also challenge the vehicle registration and licensing from the States and bring the whole road network under the Commonwealth.

The States have been out of control for far too long so we are going to call them out and force them to show that their inconsistent legislation is good government and force them to show that their legislation is consistent with the Commonwealth law of the land. We know that they cannot, which will give us the right to call for Commonwealth intervention into every State legislator. We have had enough and we are seeking support from the road users to back us up.

Cheers
Darryl O'Bryan
Senate Candidate For The Great Australian Party
In Victoria
