Hello Miles,

After our brief chat I wanted to follow up with the following:

First of all, your proposals for fixing inconsistent regulations would be easy legislation to support. When I am elected this will not appear high on my agenda but you will have my support.

Secondly, the Animal Justice Party is not a single issue party. As such we already have policies across a raft of topics that are important to all Australians. When we don't have a specific policy our parliamentarians are guided by our core values of kindness, equality, rationality, and non-violence.

I wish you every possible success with your campaign and when I am elected, please do contact me again.

Ivan Davis

**Animal Justice Party Candidate for Derwent**

We will never regret striving for a kinder society.

Dear Animal Justice Party of Tasmania,

I'm following up to see if AJP Tas have had a chance to review our pre-election commitment request to help fix modification legislation across all states and territories – each jurisdiction has varying levels of regulations, which affects modified vehicle owners, and the aftermarket industry.

If you need any additional information, please feel free to contact me on my number below.
